Course Description:
World Civilizations & Global Encounters is a two-semester compulsory university course providing a cross-cultural overview of world history from ancient to modern times. The course proceeds chronologically, but has the objective of exploring crucial themes of human activity from a global perspective. The course traces the diversity of human civilizations in terms of their historical, cultural, political and economic formation with an emphasis on their interactions, similarities and differences. The ultimate aim of the course is to reflect on the concept of historical change and its connotations for the present day.

The first semester of the course will start with a discussion of some fundamental concepts such as civilization and society. A comparative analysis of different civilizations categorized under the ancient and the medieval worlds will follow. The aim will be to provide a broad and cross-cultural overview of lines and elements connecting and separating different geographies.

Format:
Each week there will be two 90-minute lectures, complemented by one-hour discussion sessions on Fridays. The lectures and overall course material will largely follow the textbook by Tignor et al., WTWA. The Friday discussions will cover the main themes and issues of the lectures, but they will not serve as summary sessions. We will ask the students to attend the sessions with their class and reading notes as well as the assigned primary/secondary source documents from the textbook.

We will make announcements to keep you update regarding the course, lectures, discussion sessions, homework assignments and exams through the LMS. Hence, use your university email address and be sure that you receive LMS announcements. If required, we will distribute any extra course material electronically and upload them to the LMS Dropbox folder.

Textbook:
You can either purchase a hard-copy of your textbook from the campus bookstore or alternatively a digital, downloadable copy from the publisher’s website:

Attendance Requirements:
Attendance at lectures is NOT mandatory, but it is mandatory for ALL discussion sessions. Be advised that less than 80 % attendance at the discussion sections will result in DIRECT FAILURE. Indeed, last semester, around 10% of the registered students failed from this course simply because they do not follow this important rule. So, attend your Friday sessions regularly.
Absences from discussion sessions will be excused ONLY in the case of illness or dire emergency, for which you must present an official written excuse to your Teaching Assistant (TA). In such cases of absences, without exception, please send an email to your TA immediately (preferably before the discussion session), explaining the reason for your absence. If you have a medical report, also send its scanned version.

In addition, NOTE THAT, this semester some discussion sessions will serve as a venue to prepare and submit certain homework assignments as in-class activity. That is to say, if you miss such a discussion hour, you will automatically loose the points from that homework activity. Also note that there will no make-ups for homework assignments. You have to submit your homework at the time as instructed. Thus, read homework assignment sheets carefully and consult your TA if you have any questions.

Finally, ALL students must attend only those sections for which they are officially registered. DO NOT attend other sessions at any time without making official registration; such attendances will not be counted.

Homework assignments:
There will be FOUR homework assignments throughout the semester. In these exercises, you will be asked to write short papers on certain selected topics, problems or primary sources related to the lectures, readings and/or discussion sessions. Each homework, worth 5 points of your total grade, will be assigned at least a week prior to its submission deadline, which are indicated below under the course schedule. All these assignments will be announced electronically through the LMS.

Students will submit some of their completed assignments electronically to an anti-plagiarism website. Further instructions on this particular kind of submission process will be given during the first weeks of the semester. Also see the “Academic Misconduct” section below.

Make-up examinations:
You are responsible for taking the midterm and final examinations at the appointed time. Do not ask for exceptional treatment! Do not ask for a make-up examination, except in the case of a health problem, which you must document with an official written excuse. It is the student’s responsibility to take the make-up exam at the time and place that the instructor specifies. NOTE: ONLY MEDICAL REPORTS TAKEN FROM A HOSPITAL (NOT FROM A PRIVATE DOCTOR OR CLINIC) WILL BE ACCEPTED FOR MAKE-UP EXAMS.

Regarding the Resit/Bütünleme Exam, it will be given ONLY to the students who meet one of the following conditions:
- students who failed the class with a D- or F grade
- students whose written petitions or reports (for being absent in the final exam due to a medical or personal reason) are accepted by their faculty boards

Additional Class Policies:
I will start and end my lectures on time, and I expect you to arrive on time and stay until the end of class. Disruptions --including late arrival, early departure, talking to friends during lecture, taking calls on cell phones, text messaging, surfing online-- are disrespectful and distracting to both the professor and your fellow students. Any repeated such disruptive behavior may be cause for dismissal from class. Cell phones must be turned off during class time.

ACADEMIC MISCONDUCT:
The term ‘academic misconduct’ includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with written assignments and examinations. Instructors shall report all instances of alleged academic
misconduct to the Committee on Academic Misconduct. **Keep in mind:** Your teaching assistants and I have to report any academic misconduct to the Committee.

Copying a person’s work or writing (in any form) without proper citation constitutes plagiarism and it is a serious offence. In this respect, particularly in your homework assignments, **NEVER EVER** attempt to copy a friend’s homework or anything you find on the internet. Always use your own sentences and wording as this semester you will be asked to upload some of your papers to an anti-plagiarism website, which will automatically check the authenticity of your work. These systems are very efficient and easily find any copied material. Accordingly, **if such a plagiarized homework is detected, it will not only be reported to the Committee on Academic Misconduct, but also it will result in DIRECT FAILURE from this course!!** If you have any questions at all about what constitutes plagiarism or about the consequences of academic misconduct, please come and talk to me or your Teaching Assistant.

**Study Suggestions:**
- Do each week’s reading **before** that week’s classes. Go over your notes after each class. Number the pages of your notes, and cross-reference them with your textbook book.
- Use the atlas; as well as the **focus questions, maps, timelines, glossary and other internet resources** of your textbook as study aids. Your textbook provides very useful study materials. Be sure you utilize them regularly during your readings:
- Above all, keep up with the reading. There is a large amount of diverse information in this course; you cannot hope to master it by cramming at the last minute.
- In case you have any questions regarding the lectures and course materials, or if there is a gap in your notes or a concept that you just cannot figure out, please consult your Teaching Assistant or come to me.

**RESERVE CLAUSE:**
I reserve the right to make changes in the syllabus when necessary to meet the learning outcome objectives, to compensate for missed classes or schedule changes, or for similar legitimate reasons. Students will be notified of any such changes to the syllabus in adequate time to adjust to those changes.
